

# Pinwheel Paper Template

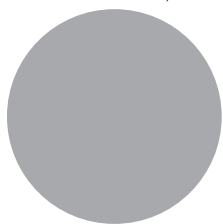

The printed square on the Pinwheel sheets is 6" x 6". Cut one of those out.

Next, cut out the 2" x 2" paper template below. Lay it on the backside of the printed square (see diagram to the left). Line up the dot in the middle of the template with the center of the 6" x 6" printed square. Make a circle or small dot at each corner of the 2" x 2" template.

Then, make 4 cuts in the printed 6" x 6" printed square from each corner to the dot you just drew.

Awesome Blossom Spring  
Fun Resource Page!**

## Center Dots

These Center Dots that are included with each printed pinwheel page are optional. They just fancy up the middle of your pinwheel.

To use: Simply cut out the dot you want to use and pin it to the center to cover up the pointed edges of the pinwheel.

Cut out this 2" x 2" square template to mark the backside of the printed pinwheel sheets. Line up the center of the printed pinwheel sheet with the center dot on this template.
